P8	12	zip ties	step 5

FEEL THE HEAT!

12 pc Light Kit Part & Hardware List			
ITEM	QTY	Description	STEP USED
P1	1	RF Bluetooth Control	See attached directions
P2	1	Key Chain Remote	See attached directions
P3	12	7" PVC strip with 9 LED	step 5
P4	2	120" extension wire	step 3 - 4
P5	4	60" extension wire	step 3 - 4
P6	6	36" extension wire	step 3 - 4
P7	3	1 - 2 splitters	step 3 - 4
P8	12	zip ties	step 5

Step 1: Place vehicle on a flat and level surface. Place gear selector in "Park" and remove keys from the ignition.

Step 2: (Optional) If wiring a rocker switch, extra wire will be needed to run power to the RF bluetooth control box if desired. Locate power source, connect (P1) wires to source, and connect to wire harness (P1). (Figure A).

Step 3: Locate desired location for wire harness

Note:

Step 4: Install the bluetooth box and route the wiring to the locations for mounting your lights. Make sure to hook up the red wire (+) and the black wire (-) ground to the correct power bar connection. (Figure A) The blue wire is to be connected to the (+) side of the brake line wires. When braking happens all the lights will change to red.

Step 5: PVC light strip (P3) are provided with 3M sticky back tape for mounting (Figure B), but come with screw holes at each end of the light if you want to hard mount with screws. (screws are not provided) Rotate the light the direction you want and stick in place. Zip ties are also provided to help secure lights in place. (Figure D)

Bluetooth and remote control instruction will be included on a separate instruction form.

ProTip: Periodically check all hardware and re-tighten if needed.
