Part & Hardware List			
ITEM	QTY	Description	STEP USED
P1	1	Wire Harness with Connectors	
P2	1	Rocker Switch	
P3	1	Fuse	

Tools Required

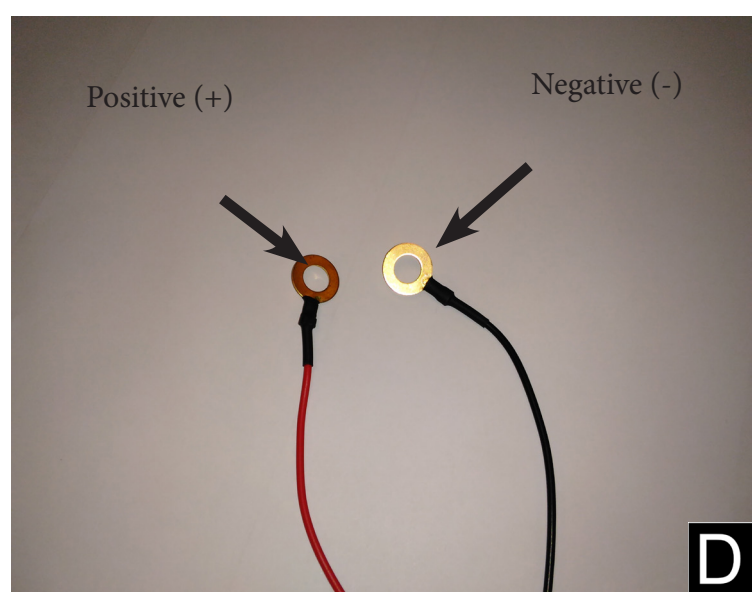

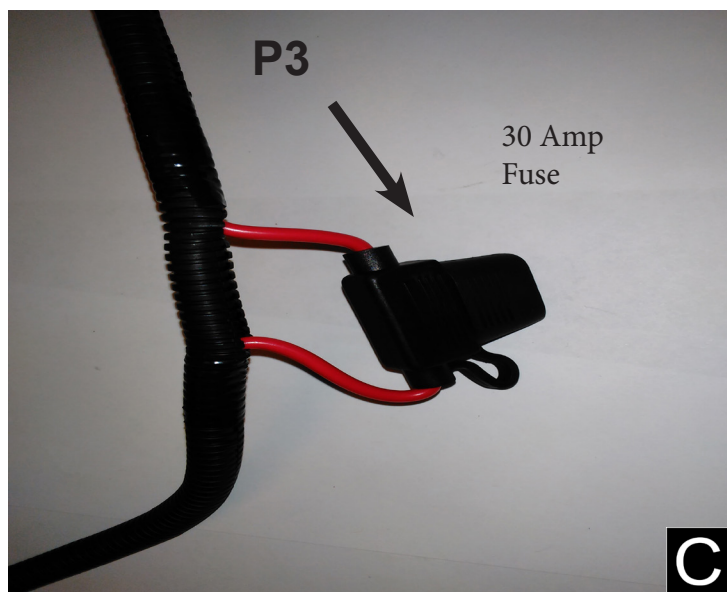

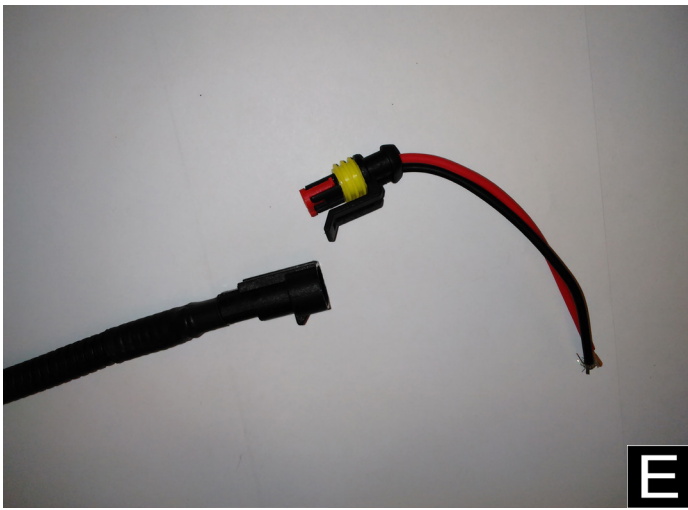

Step 1: Place vehicle on a flat and level surface. Place gear selector in "Park" and remove keys from the ignition.

Step 2: Rocker switch is pre-wired (P2) for your convenience. (Figure A & B) For protection, the wire harness comes with a built in 30 amp fuse. (P3) (Figure C).

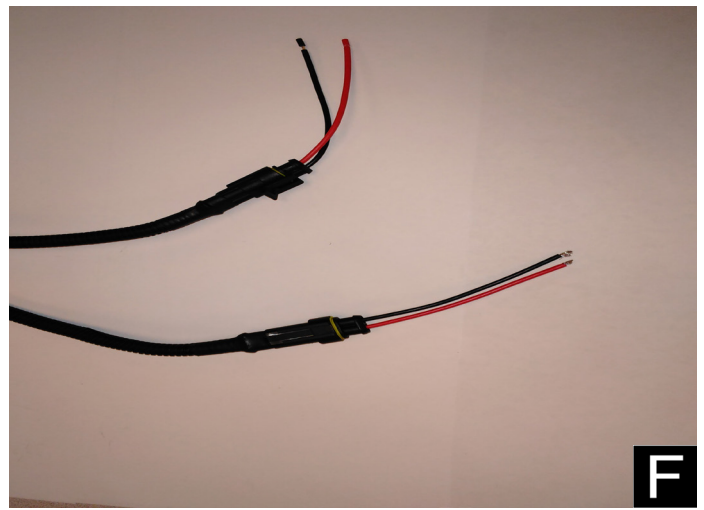

Step 3: Locate power source, connect Positive (red) and Negative (black) wires to the power bar (recommended) or the battery source (If connect to battery directly the rocker switch will stay on). Locate desired location for wire harness to whip, route the wire and zip tie in place to secure the whip connector to the desire location of the vehicle.

Single Whip Connector

Dual Whip Connector

Step 4: The Harness is made with a single (Figure E) or dual (figure F) water resistant connector. (Figure G) Shows the provided connected wired to the light whip quick release mount.

This completes installation. Time to ride and enjoy!

Supplied connector wired to whip light quick release.
