

Finish Line **CERAMIC GREASE**

Advanced Bearing Lubrication for Bicycles

Finish Line's Ceramic Grease is the bicycle industry's newest and most advanced bearing lubrication technology.

- Formulated with micron-sized ceramic particles, Teflon® fluoropolymer and premium non-toxic synthetic oils
- Guaranteed to optimize the performance and efficiency of bottom brackets, hubs and headset bearings
- As bearings become coated with Teflon® and ceramic particles, friction and heat are dissipated
- Bearings last longer and run quieter & smoother

Finish Line's Ceramic Grease utilizes patented technology to ceramically "reinforce" the product's Teflon® (PTFE) structure. This process significantly increases durability and improves extreme pressure, load carrying and anti-wear properties of the grease. Benefits include energy savings, smoother operation, extended life, and reduced maintenance costs. Ceramically "reinforced" Teflon® prevents surface-to-surface contact and scuffing while providing unmatched low-friction lubrication under boundary conditions. Therefore, Finish Line's Ceramic Grease can also be used as an anti-seize assembly grease on seat posts, stems and crank bolts.

Available in: 2 oz tubes, 1 pound tubs, 35 pound pails, 400 pound drums

TYPICAL SPECIFICATIONS

Thickener Type	Inert Silica	Dropping Point (ASTM D 2265) °F (°C)	No Drop
Thickener Compatibility	All Grease Types	Oil Separation (ASTM D 1742) 24 hours @ 25°C (77°F) (%)	0.10
NLGI Grade	2	Oxidation Stability psi press. drop/100 hours	0
Texture	Smooth Thixotropic	4 ball wear test (ASTM D 2266) m.m scar, 40 kg, 1200 RPM 75°C, 1 H	0.74
Color	Translucent White	4 ball EP test (ASTM D 2596) LWI, kg	38.4
Odor	Odor-free	Weld point, kg	400
Oil Type	Synthetic PAO/Ester	Timken OK load (ASTM D 2509) lbs	65
Viscosity SUS @ 100°F	556	Rust test rating (ASTM D 1743)	Pass
Viscosity cSt @ 40°C	120	Water washout (ASTM D 1264) @ 79°C (175°F) % loss	1
V.I.	120		
Base Oil Characteristics			
Functional Solids	Ceramic BN / PTFE		
Penetration @ 25°C (77°F) (ASTM) D 217), mm/10			
Worked 60 strokes	270-290		
Worked 100,000 strokes, change from 60 strokes	2
