

Finish Line™ **MAX™** SUSPENSION SPRAY Quickly Fights Stiction

Over time fork stanchions become dry and dirty. This can result in loss of travel, slow rebound, and cause the fork to feel very stiff over bumps. When this happens a quick spray of Max™ will immediately improve fork performance.

Made with carefully chosen polysiloxane and advanced fluoropolymers. Max is formulated to eliminate stiction, condition and protect seals, O-rings, and other rubber parts. Max improves the surface slip of any stanchion, even ones that are coated!

Use Max on an old fork to bring it back to life. Also, use Max to help break in new forks and optimize their performance potential. As Max eliminates stiction, forks run more smoothly and quietly. Small bumps are instantly absorbed and response to big hits is noticeably improved.

Max™ Suspension Spray will keep your bike in race-ready condition!

FEATURES

- Formulated with specifically chosen polysiloxane
- Includes advanced fluoropolymers
- Easy atomized aerosol application
- No CFC's
- Spray all angles

BENEFITS

- Eliminates stiction, conditions and protects rubber components
- Provides 'boundary' lubrication to enhance slip & protect surfaces as polysiloxane film wears down
- Ensures a uniform coating that is not too heavy
- Will not deplete ozone layer
- Allows user to more evenly coat the stanchion

AVAILABLE SIZES

- 12oz Aerosol
