

## **FITMENT AND WASHING INSTRUCTIONS**

NOTICE : DO NOT INSTALL COVER IF EXHAUST PIPE IS HOT  
NOTICE : DO NOT TOW VEHICLE WITH COVER ON

Installing your new GEARS cover is easy! Put cover on the vehicle seat and adjust cover on the windshield by aligning upper stitch along windshield edge. Adjust cover to wrap around the mirrors and handlebar. You may start to secure the cover around the front tire first, then secure the cover over the rear tire last.

\*Note: The elastic around the bottom of the cover will hold in place under normal weather conditions. Be cautious when installing the cover on the vehicle which has been just driven to ensure the material does not come into contact with hot parts or pipes.

### **REMOVING THE COVER :**

- Lift both ends of the cover from under front and rear tires and fenders.
- Pull up the front part of cover over handlebars and mirrors then pull up the rear of the cover over the seat

### **CLEANING METHOD :**

1. Hose down the cover thoroughly both inside and out to remove dirt.
2. Any mild detergent may be used.

### **NOTICE :**

Do not machine wash or allow to dry on the vehicle  
Do not machine dry  
Do not dry clean
