HOGTUNES XL SERIES SPEAKERS WILL WORK BEST WHEN POWERED BY AN AMPLIFIER.

IMPORTANT: Hogtunes XL Series are 2Ω (ohm) speakers and will cause damage if wired directly to 98-05 factory radios built in power!

572-XL LID SPEAKER INSTALLATION INSTRUCTIONS

The 5x7" speakers in this kit are direct replacements for OE "Stage 1" in factory lids and also fit most popular aftermarket 5x7" saddlebag speaker lids. The instructions below are written around factory OE 5x7" lids.

- Step #1:** Make sure your ignition switch stays in the "OFF" position. Open the lid and remove the 4 "torx" head screws that secure the grill to the lid. Remove the grill and put aside.
- Step #2:** Remove the factory screws that secure the speaker. Lift the speaker away from the lid and carefully undo the speaker wires.
- Step #3:** You will see that the 572-XL has standard speaker "spades" built in, as well as a mating plug to the OE connector molded in. If you are doing a custom installation and need to use the gold spades, the smaller (0.1875") connector is the positive, and the larger (0.250") is the negative. Attach the speaker wires to the speaker.

Note: Hand screwdrivers are strongly recommended for Steps 4 and 5

- Step #3:** With the speaker wires attached, sit the speaker into position on the lid, and use the 4 factory screws removed earlier to secure the speaker to the lid.
- Step #4:** Using the 4 factory screws removed earlier, re attach the grill to the lid
- Turn your radio to confirm that both speakers are playing. Your new 572-XL lid speakers are ready to enjoy!
