

KLOCK WERKS PARTICIPATES IN THE REVIVAL, OFFERING 19" STAMPED STEEL FRONT FENDERS FOR FXR, DYNA AND SPORTSTER MODELS

(Mitchell, SD) March 14th, 2016 –

While it's important in any industry to lead with innovative designs and ideas, there are certain styles that are timeless trends. Brian Klock's love for FXRs goes way back to his first Harley (a 1986 FXR) and his first kustom (a 1990 FXRP). Brian's first ride to Daytona Bike Week was on that FXR! So as Klock Werks develops new parts, from their Flare™ Windshield for FXRP, to their club style KlipSplitter Handlebars and now, 19" stamped steel fenders, they feel that this trend never really went out of style. It may have sat quietly on the sidelines as baggers, and then big wheel baggers, took over for 300 rear tire choppers, but it was always there.

The FXR and Dyna craze seems to have come back to the forefront, with young riders noticing and getting up to speed on cool designs of the past, and Klock Werks is happy to accommodate their desire to kustomize, as well as participate in the revival. Klock Werks is now offering several profiles for Sportster, Dyna and FXR riders to choose from!

“The market was begging for these fenders,” Dan Cheeseman, Klock Werks Chief Operating Officer, and a 2014 Dyna StreetBob owner, said. **“As I customized my own Dyna, we worked to develop styles for riders to choose from. And of course our fenders are designed to bolt right on, making customizing in your own garage easy.”**

Klock Werks has been told time and time again - painters love our fenders! All Klock Werks Fenders are stamped from 14 gauge steel using precision, deep-draw stamping technology that ensures a consistently smooth and flawless finish, minimizing bodywork. Klock Werks then goes the extra mile to add e-coat (electrostatic coating), a process to prevent rust and corrosion. Taking the guesswork out of installation and customization was hardly a second thought. Klock Werks' Fenders are laser cut using 5-axis laser technology to ensure accurate fitment for direct bolt-on installation.

The new 19" Fender fitments are available for Sportsters, FXR's, and Dynas. The fenders for the 39mm front ends do not require mounting blocks, and the new Dyna 49mm fenders are FIT KITS (blocks included).

Klock Werks always seeks to make parts that make sense, fit right out of the box, look great, and are made of the best quality, right here in the USA. Fenders are available online at getklocked.com or through your local Drag Specialties dealer.

About Klock Werks

Located in Mitchell, South Dakota, Klock Werks has grown from humble beginnings to a nationally and internationally recognized Brand. Achieving status as "Air Management Experts", Klock Werks credits this to the success of the original, patented, Flare™ Windshield. Also supplying fenders, handlebars, and other motorcycle parts, Klock Werks proudly leads the industry through innovation in design and quality of materials and fitment. Team Klock Werks has been successful for years designing parts, creating custom motorcycles, and setting records on the Bonneville Salt Flats. You will find motorcycles, family, and faith at the core of Klock Werks, along with a commitment to caring for the needs of enthusiasts around the world who enjoy their products.
