

# FRONT FENDERS

PRE-DRILLED FOR  
DIRECT BOLT-ON USE

STAMPED  
STEEL

E-COATED TO PREVENT  
RUST AND CORROSION

LASER CUT  
PROFILES FOR  
A SMOOTH FINISH

PRECISION, DEEP-DRAW  
STAMPING TECHNOLOGY

When you buy a fender from Klock Werks, you can count on quality and accurate bolt-on fitment. To make installation even easier, some of our fenders are packaged with mounting blocks and hardware in one box. Look for the FIT KIT logo!

In the **FRONT FENDER FIT KITS** we include:

- 1 Stamped Steel Front Fender
- 2 Chrome Billet Aluminum Mounting Blocks
- 3 All Necessary Hardware

SOME FRONT FENDER INSTALLATION REQUIRES USE OF MOUNTING BLOCKS. IF YOU ARE NOT BUYING A FIT KIT, MAKE SURE YOU HAVE THE RIGHT MOUNTING BLOCKS.

## STAMPED STEEL FRONT FENDERS

Changing your front fender is an easy way to add some personal style! The Klock Werks design team has put together great options ranging from traditional bagger style, to tire hugging options, to one-piece front fenders for big wheel bagger projects.

All of Klock Werks Front Fenders are stamped from 14 gauge steel using precision, deep-draw stamping technology that ensures a consistently smooth and flawless finish, minimizing bodywork. Laser cut using 5-axis laser technology to ensure accurate fitment for direct bolt-on installation. Klock Werks then goes the extra mile to add e-coat, a process to prevent rust and corrosion. Painters love Klock Werks Fenders and you will too!

**Klock Werks FRONT FENDER MOUNTING BLOCKS** (Klock Blocks) are designed to provide perfect spacing for easy installation of any Klock Werks Front Fender. Machined from billet aluminum, available in chrome or raw finish, and are sold in pairs. If you are not buying a Front Fender Fit Kit, be sure you order blocks. Sold separately. Call with questions.
