

!!! WARNING !!!

This is an aftermarket part built for racing purposes only.

Koso is not responsible for any damages caused to the parts, vehicle, or to yourself and others.

Engine parts are not under warranty nor is collateral damage or cost of labor, in cases of malfunction.

- Thank you for purchasing KOSO MSX Intake rubber.
- Main functions: Meeting the demands of larger cylinder and improved power by improved air intake volume and efficiency effectively.
- Read the following notes and precautions carefully before installing your product.

INSTALLATION Picture expression

Please proceed as follows

1. Remove the air filter tank and clean its inner part.
2. Enlarge connect tube hole to be \varnothing 50mm (position ① on drawing).
3. Install your KOSO air filter hose.
4. Apply silica gel around the hose connector to keep it air tight and fixed to complete your installation work.

NOTE Replaced air filter hose would improve air intake and reduce noise.
