### 3-1 Basic function instructions

**Record**

- Maximum number of recorded runs: 50 runs
- Maximum recording time for a single record run: 95m 34s 00; the recording will stop upon reaching the maximum time.
- Total recording time: Approximately 1.59 hours

**Play mode Speed**

- ◀ 1x rewind/pause
- ▶ 1x play/pause
- ⏮ 1/3x play/pause
- ⏭ 3x play/pause

**Backlight brightness**

- Setting range : 1-5~5-5
- Setting unit : 1

**EGT L/R**

- Display Range : 200~1,200°C(250~2100°F)
- Display unit : 1°C(°F)

**Water Temp**

- Display Range : 0~250°C(32~482°F)
- Display unit : 1°C(°F)

**RPM**

- Display Range : 0~15000 RPM

**Voltage**

- Display Range : 8.0~18.0V

**Warning for RPM**

- Setting range : 1,000~15,000 RPM
- Setting unit : 100RPM

**Warning for temp (EGT L/R)**

- Setting range : 200~1,000°C(392~1832°F)
- Setting unit : 1°C(°F)

**Warning for water temp**

- Setting range : 60~250°C(140~482°F)
- Setting unit : 1°C(°F)

**Right button**

- In main screen, hold the right button for 3 seconds to switch between °C and °F

- Hold the right button for 3 seconds, to clear the MAX recording screen.

**Warning for low voltage**

- Setting range : 8.0~13.0 V
- Setting unit : 0.1V

**Warning for high voltage**

- Setting range : 13.0~16.0 V
- Setting unit : 0.1V

### 3-2 Features and settings description

● Temperature	Display unit : °C、°F	
● EGT L/R	Display Range : 100~1,200°C(250~2,100°F)	Display unit : 1°C(°F)
○ Warning for temp (EGT L/R)	Setting range : 200~1,000°C(392~1,832°F)	Display unit : 1°C(°F)
● Water temperature	Display Range : 0~250°C(32~482°F)	Display unit : 1°C(°F)
○ Warning for temp (Water)	Setting range : 60~250°C(140~482°F)	Setting unit : 1°C(°F)
● Tachometer	Display Range : 0~15,000	Display unit : 10 RPM
○ Type of RPM signal	Setting range : HiAct、LoAct	
○ RPM input pulse	Setting range : P-0.5、P-1、P-1.5、P-2、P-2.5、P-3~P-24	
○ Warning for RPM	Setting range : 5,000~15,000	
● Max. EGT record	Display Range : 200~1,000°C(392~1,832°F)	Setting unit : 100 RPM
● Max. Water record	Display Range : 60~250°C(140~482°F)	Display unit : 1°C(°F)
● Max. RPM record	Display Range : 15,000	Display unit : 1°C(°F)
● Voltmeter	Display Range : 0.8~18.0 V	
○ Warning for low voltage	Setting range : 8.0 ~ 13.0 V	Setting unit : 0.1 V
○ Warning for high voltage	Setting range : 13.0 ~ 16.0 V	Setting unit : 0.1 V
● Auto/Manual Record Stop	Setting range : 0~60 Sec	Setting unit : 1 Sec
● Backlight brightness	Setting range : 1 - 5 (darkest)~ 5 - 5 (brightest)	Setting unit : 1
● Operating voltage	DC 12 V	
● Temperature range	-30~+60°C	
● Specifications	JIS D 0203	
● Meter Size	W124 X L58.5 X H22 mm	
● Meter Weight	+/- 170 g	

**NOTE** Design and specifications may change without further notice.

## 4 The Settings Screen Description

### ● Main screen

### ● Settings Screen

### ● RPM input pulse

### ● Type of RPM signal

### ● Backlight brightness

### ● Auto/Manual Record Stop

### ● Warning for high voltage

- In the main screen, hold the right button and the left button for 3 seconds to enter the setting screen.
- Press the left button to choose the setting number.
- Press the right button to choose the setting number / switch setting screen. In order; RPM input pulse · Type of RPM signal · Warning for RPM · Warning for temp (EGT L) · Warning for temp (EGT R) · Warning for water temp · Warning for low voltage · Warning for high voltage · Auto/Manual Record Stop · Backlight brightness

**NOTE** If you enter the settings screen and don't press any buttons for 20 seconds, it will automatically return to the main screen.

### ● Warning for low voltage

### ● Warning for water temp

### ● Warning for RPM

### ● Warning for temp (EGT L)

### ● Warning for temp (EGT R)

## 4-1 RPM Input Pulse Setting

- In the main screen, hold the right button and the left button for 3 seconds to enter the RPM Input Pulse Setting.
- EX. You need to connect the RPM signal wire to the pick up signal and there are 12 flywheel signals per turn.
- Press the right button once to choose the setting number.

⚠ Now the setting value will blink.

### NOTE

Setting range : P-0.5 · P-1 · P-1.5 · P-2 · P-2.5 · P-3 ~ P-24 ·

Default value : P-1 ·

- Example : Set the RPM input pulse value from P-1 to P-12.

- Press the left button once enter the type of rotation speed signal.

- Type of RPM signal screen.

## 4-2 Type Of RPM Signal Setting

- EX : To set type of RPM signal value to Lo Act.
- Press the right button once to choose the setting number.

⚠ Now the setting value will blink.

**NOTE** Setting range : Hi Act · Lo Act  
Default value : Hi Act

- Example : Set the type of RPM signal from Hi Act to Lo Act.

- Press the left button once to return to the Warning for RPM screen.

- Warning for RPM screen ·

## 4-3 Over RPM Warning Setting

- EX : To set the Warning for RPM value to 11,000 RPM
- Press the left button once to choose the setting number.

⚠ Now the setting value will blink.

### NOTE

Setting range : 5,000 ~ 15,000 RPM ·  
Setting unit : 100 RPM ·  
Default value : 9,000 RPM ·

- Press the right button to choose the setting number.

- Example : Set the Warning for RPM value from 9,000 RPM to 11,000 RPM.

- Press the left button once to enter the warning for temp (EGT L) screen.

- Warning for temp (EGT L) screen.

#### 4-4 Over EGT L Warning Setting

●EX : To set the Warning for temp (EGT L) to 1200°F

●Press the left button once to choose the setting number.

△ Now the setting value will blink.

**NOTE**

Setting range : 200~1,000°C(392~1832°F)  
Setting unit : 1°C(°F)  
Default value : 538°C(1,000°F)

●Press the right button to choose the setting number.

●Example : Set the Warning for temp (EGT L) value from 1000°F to 1200°F

●Press the left button once to enter the warning for temp (EGT R) screen.

●Warning for temp (EGT R) screen.

#### 4-5 Over EGT R Warning Setting

●EX : To set the Warning for temp (EGT R) to 1200°F

●Press the left button once to choose the setting number.

△ Now the setting value will blink.

**NOTE**

Setting range : 200~1,000°C(392~1832°F)  
Setting unit : 1°C(°F)  
Default value : 538°C(1,000°F)

●Press the right button to choose the setting number.

●Example : Set the Warning for temp (EGT R) value from 1000°F to 1200°F

●Press the left button once to enter the warning for Water temp screen.

●Water temp screen.

#### 4-6 Water Temp Warning Setting

●EX : To set the warning for water temp to 248°F

●Press the left button once to choose the setting number.

△ Now the setting value will blink.

**NOTE**

Setting range : 60~250°C(140~482°F)  
Setting unit : 1°C(°F)  
Default value : 82°C(180°F)

●Press the right button to choose the setting number.

●Example : Set the Warning for water temp from 180°F to 248°F

●Press the left button once to enter the warning for low voltage.

●Low voltage screen.

#### 4-7 Warning For Low Voltage Setting

●EX : To set the warning for low voltage to 11.0V

●Press the left button once to choose the setting number.

△ Now the setting value will blink.

**NOTE**

Setting range : 8.0 ~ 13.0 V  
Setting unit : 0.1 V  
Default value : 10.5 V

●Press the right button to choose the setting number.

●Example : Set the warning for low voltage from 10.5 V to 11.0 V.

●Press the left button once to enter the warning for high voltage.

●High voltage screen.

#### 4-8 Warning For High Voltage Setting

●EX : To set the warning for high voltage to 16V

●Press the left button once to choose the setting number.

△ Now the setting value will blink.

**NOTE**

Setting range : 13.0 ~ 16.0 V  
Setting unit : 0.1 V  
Default value : 15.0 V

●Press the right button to choose the setting number.

●Example : Set the warning for high voltage from 15.0 V to 16.0 V

●Press the left button once to enter the warning for Auto/Manual Record Stop screen.

●Auto/Manual Record Stop screen.

## 4-9 Auto / Manual Record Stop Setting

- EX : To set the Auto / Manual Record Stop to 10 Sec.
  - Press the left button once to choose the setting number.
- ⚠ Now the setting value will blink. Auto / Manual Record Stop Function is off when setting is display "0 SEC".

- Press the right button to choose the setting number.

### NOTE

Setting range : 0 ~ 60 Sec  
Setting unit : 1 Sec  
Default value : 0 Sec

- Example : Set the Auto / Manual Record Stop from 0 Sec to 10 Sec.
- Press the left button once to enter the backlight brightness screen.

- Backlight brightness screen.

## 4-10 Backlight Brightness Setting

- EX : To set backlight brightness value to 5/5.
  - Press the right button once to choose the setting number.
- ⚠ Now the setting value will blink.

### NOTE

Setting range : 1/5 ~ 5/5  
Setting unit : 1/5  
Default value : 3/5

- Example : Set the backlight brightness value from 3/5 to 5/5.
- Press the left button once to enter the main screen.

- Main screen

## 5-1 How to switch functions

### ● 5-1-1 Left button function instruction (EGT L · RPM · MAX)

- Press the left button once to switch from EGT L/R to RPM/EGT R.

- Press the left button once to switch from RPM/EGT R to MAX EGT L/R

- Press the right button once to switch from highest EGT L/R to MAX RPM/MAX water temp.
- Hold the right button for 3 seconds, to clear the MAX recording screen.

- press the left button once to return to the main screen.

### ● 5-1-2 Right button function instruction (EGT R · Water temp · Voltage)

- Press the right button once to switch from EGT L/R to EGT L/Water temp.

- Press the right button once to switch from EGT L/Water temp to EGT L/Voltage.

- Press the right button once to switch from EGT L/Voltage to EGT L/R.

### ● 5-1-3 Recording Screen

- In the main screen, press the right & left buttons to enter the recording screen. (Check section 5-2 for detail)

### ● 4-1-4 Play Screen

- In the recording screen, press the right & left buttons to enter the playback screen. (Check section 5-3 for detail)

### ● 4-1-5 Setting Screen.

- In the main screen, hold the right button and the left button for 3 seconds to enter the setting screen. (Check section 4 for details)

## 5-2 Operating Description of the Recording Screen

- Main screen, press the right & left buttons to enter the Recording Screen.

- Recording Screen

**NOTE**

Hold the left button for 3 seconds, to enter the operating screen for clearing records.

- The recording screen, press the left button once to start recording.

⚠ Now the REC will blink.

- At the screen during recording, press the left button once to stop recording.
- The first run has been recorded.

- To stop the recording screen, press the left button once to enter the recording screen for the second entry.

- Currently it is in the recording screen for the second entry.

- Currently it is in the recording screen for the third entry.

- Currently it is in the recording screen for the fourth entry.

- Recording screen, press the right & left buttons to enter the Play Screen.

- Playback screen

## 5-3 Operating Description for the Playback Screen

- Recording screen, press the right & left buttons to enter the Play Screen.

- Previewing, press the right button to switch from EGT L/R to RPM/water temp
- Playing, press the right & left button to switch from EGT L/R to RPM/water temp

- Press the left button once to select the run to be played.

- Press the right button once to select how the run is played.

- Press the left button once to enter the play / stop screen.

- Hold the right button for 3 seconds, to enter the Main screen.

## 5-4 Operating Description for Clearing Records

- At the recording screen, hold the left button for 3 seconds to enter the operating screen for clearing records.

- Hold the left button for 3 seconds, clearing records.
- Press the right or left button, cancel clearing records.

- Clearing the record; wait for a few seconds to complete clearing.

- Done

## 5-5 Multiple Warning display Operating Description

### ● Left Screen

● Press the left button once to switch from EGT L to RPM.

● Press the left button once to switch from RPM to EGT L.

### ● Right Screen

● Press the right button once to switch from EGT R to water temp.

● Press the right button once to switch from water temp to voltage.

● Press the right button once to switch from voltage to EGT R.

⚠ Now the warning value will blink.

**NOTE** Return to the first after 10 seconds.

## 6 Troubleshooting

The following situations do not indicate malfunctions of the product. Check the following before taking it in for repair.

Trouble	Check item	Trouble	Check item
<p>The meter doesn't work when the power is on.</p> <p>The meter shows wrong information.</p> <p>Tachometer doesn't appear or appears incorrectly.</p>	<ul style="list-style-type: none"> <li>●The power isn't supplied to the meter. →Please make sure the wiring is connected. The wiring and fuse are not broken.</li> <li>→The battery is too old to supply the needed power (DC 12 V).</li> <li>●Check the voltage of your battery, and make sure the voltage is over DC 12 V.</li> <li>●May be due to poor connection of wires. →Check whether the wiring is disconnected or has fallen off.</li> <li>●May be due to the failure to change to the type R spark plug.</li> <li>●May be wrong settings. →Check the settings menu to confirm whether the setting for RPM is correct.</li> </ul>	<p>Voltage doesn't appear or appears incorrectly.</p> <p>Temp does not appear or appear incorrectly.</p>	<ul style="list-style-type: none"> <li>●Wiring for the connector may be poorly installed. →Confirm whether the wires for the connector are properly installed.</li> <li>●Check the sensor →Check whether the wiring is disconnected or has fallen off.</li> </ul>
