THANK YOU FOR CHOOSING KÜRYAKYN!

PLEASE NOTE
It is the installers' responsibility to make sure all fasteners (including pre-assembled) are tightened before operation of motorcycle. Küryakyn will not warranty components that are lost due to improper installation. Periodic maintenance may be required.

TOOLS SUGGESTED
7/16" combination wrench.

ATTENTION! The license plate helmet lock fits many configurations; the lock can be mounted on either the left or right side of the license plate bracket. The lock can also be mounted with the locking loop towards the front or the rear of the bike.

PROCEDURE
STEP 1   Remove your existing license plate.

STEP 2   Determine the best position for the helmet when mounted in the lock; this is usually on the kickstand side of the motorcycle, so that the helmet leans away from the fender.
