STRICTLY OBSERVE THE FOLLOWING GUIDELINES IN ORDER TO USE THE PRODUCT PROPERLY AND AVOID POTENTIALLY DANGEROUS ACCIDENTS.

STEP 1 Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface and turn off the ignition. Let cool.

WARNING! YOU WILL BE WORKING AROUND THE ENGINE AND EXHAUST SYSTEM DURING INSTALLATION. ENSURE THAT THE ENGINE AND EXHAUST SYSTEM HAVE FULLY COOLED TO PREVENT INJURY.

STEP 2 Put the bike on the center stand and remove the stock exhaust tips. The three fasteners securing each tip are located on the bottom and inboard sides of the tips.

STEP 3 Slip the Kuryakyn Turndown Extensions onto their respective mufflers. Apply a dab of the included anti-seize to each M6 x 1.0 x 12mm Hex Flange Screws and loosely install the extensions using these and the existing mounting holes.

STEP 4 Align the tips. There is usually enough play in each extension's mounting holes to rotate them into alignment. If for some reason the tips do not afford enough adjustment, loosen the clamp that secures the muffler to the head pipe and rotate the entire muffler body. Once properly aligned, tighten all fasteners securely and wipe off the extensions and mufflers.

ATTENTION! It is the installer's responsibility to ensure that all of the fasteners (including pre-assembled) are tightened before operation of the motorcycle. Kuryakyn will not issue a warranty on components lost due to improper installation. Periodic maintenance may be required.
