

## **MotoSeat seat cover installation:**

### Tools needed:

- Staple gun with 3/8" staples
- Flat head screwdriver
- Needle-nose pliers
- Razor knife

### Step 1:

Place new seat cover in the sun or a warm location for about 15-20 mins.

### Step 2:

Remove the old seat cover and all the staples from the seat.

### Step 3:

Place seat cover over the front of the seat.

### Step 4:

Center front of seat with the seat cover and staple 2-3 staples in the center.

### Step 5:

Pull seat cover over the back of the seat, adjust logo so that the logo is about 1-2 inches from the back or bottom of the seat then staple 2-3 staples.

### Step 6:

Stretch cover over the corners of the seat by pulling the seat cover around the corners and stapling 2-3 staples on each side.

### Step 7:

Pull the seat cover along the sides pulling out wrinkles as you go, staple a few times on one side then do the same area on the other till all the wrinkles are out and the cover is stapled in place.

### Step 8:

Once cover is completely installed trim off any excess material with a razor knife.

### Step 9:

Reinstall seat on bike and enjoy.
