Removal of stock seat from motorcycle

1. Remove screw that attaches nose of stock seat to frame at the base of the gas tank.
2. Lift stock seat from bike. Springs at rear of seat are friction fit on studs and will stay attached to seat when it is removed from the bike.
3. Stock frame cover stays in place on bike for installation of Mustang Cyclone Solo seat.

4. Turn stock seat over. Remove the front pivot mount (HD #51482-08) from the seat. This piece will be used on the Mustang seat.

5. Remove the spring and bracket assembly from the rear of the stock seat. This assembly will be used on the Mustang seat.

Installation of Mustang Cyclone Solo seat with spring mount:

1. Turn Mustang Cyclone solo seat over to attach mounting hardware to baseplate.

2. Install supplied pivot mount adapter bracket #B30127 to nose of the Cyclone solo seat baseplate using two ¼-20 x 5/8" long Phillips flat head screws. Tighten.

3. Place the stock HD front pivot mount (HD #51482-08) which was removed from the stock seat, onto the 5/16" stud on the pivot mount adapter bracket.

4. Attach pivot mount using 5/16 flat washer and 5/16-18 flange nut. Tighten.

5. Attach spring and bracket assembly from stock seat onto rear of Mustang Cyclone solo seat using the two ¼-20 x ¾" long Phillips truss head screws. Tighten.

6. Align the pivot mount with the frame mount at the base of the gas tank and install the stock pivot screw. Tighten. Springs are a friction fit over rear studs.
