

Exhaust Heat Shield Mounting Instructions

#RG-HS

Please read instructions carefully before installation. We recommend this product be installed by a qualified, and experienced technician. If you are unsure of any of the below directions and or your ability to correctly and securely install this product, please contact us or your local dealer for help. Below diagrams show typical installation, your vehicle may be different so please use diagrams as a guide. Make sure your vehicle is clean and free from dirt, road grime etc. where the this product mounts. It is the riders responsibility to make sure the product is mounted and secure before each use. Loading the bag may result in a change of position, always check for proper mounting position after loading and before each and every ride.

To install the heat shield, feed included hose clamp through the 2 slots on the heat shield and slightly tighten.

Slide the heat shield and hose clamp over your exhaust and position for optimal protection.

With the heat shield positioned, continue to tighten until snug. Once mounted, double check location and that your Panniers or saddlebags will not touch the exhaust.

With your mounting location confirmed, use a pair of pliers or metal shears to cut off the excess hose clamp.

Warning:
