

NEW RAGE CYCLES

INSTALLATION INSTRUCTIONS

RAGE360

FRONT TURN SIGNALS

- 1 Remove stock blinkers (only if you want to)
- 2 Mount to each fork leg and adjust vertical position as desired. Use windex if necessary to make it easier for yourself. A video is available on product page on our website:
http://www.newragecycles.com/Rage360_Turn_Signals_p/rage-360.htm
- 3 Zip tie wires for nice presentation and wire into stock wiring harness.

**** If you added a running light upgrade to your order, wiring instructions are provided for this module in its package. Please follow these instructions for wiring your turn signals. ****

**** If you added a Dual-Load Equalizer to your order, wiring instructions are provided for this module in its package. Please follow these instructions for wiring your turn signals. ****
