

## ENSURE YOUR FORK IS COMPATIBLE - VERY IMPORTANT

Incompatible forks: Fox 38 with Oval steerer (Use a EDC Threaded install), Rock Shox 35 Forks, Giant Overdrive 2 Forks. Cannondale Lefty Forks. Carbon Steerers

### STEERER TUBE LENGTH

Most forks are compatible, except for a small number of forks with very short steerer tubes. For the following cases your fork steerer tube length must meet the minimum length requirement.

- Fox except Fox 38 with oval steerer = 190mm min
- RockShox Forks = 220mm min
- All other compatible forks = 190mm min

Measure from the **underside** of your fork crown to the top of your spacer stack, or top of your stem if you are not running any spacers above your stem.
