Color: N - Natural | G - Gold / Ring Type: DG - DualGuard (2 sealing lips & lubrication pools per side) | TG - TripleGuard (3 sealing lips & lubrication pools per side) / Master Link Type: PF - Press Fit / (\*) Indicates gold outer, non-gold inner plates | (\*\*) Indicates gold outer and inner plates

## SUNSTAR MANUFACTURER RECOMMENDATIONS

All chains should be installed by a certified mechanic, using the proper installation tools. Chain adjustment should be done per the bike maker's owner's manual instruction.

Always check sprocket alignment when installing new drive components and during routine maintenance and adjustment; mis-aligned sprockets are detrimental to the life of the drive system.

It is always recommended to replace your chain with the same size (pitch)

and type of chain (sealed or non-sealed) that originally came on the motor-cycle from the factory.

Avoid using volatile solvents such as gasoline, thinners and/or benzine; it is best to consult with your local dealer before using any cleaners and/or lubricants.

For best results and the longest life possible replace all drive compenents (sprockets and chains) at the same time (preferably using both Sunstar chain and sprockets).
