

Wolfman Enduro Dry & Ultra-Lite Saddle Bag Tips

The Enduro Dry and Enduro Ultra-Lite Saddle bags are the same shape. They fit and function the same way. The Enduro Dry are constructed of our Ballistic Vinyl, the Enduro Ultra-Lite are constructed of X-Pac 4 layer Sailcloth.

Once the Saddle Bags are mounted- ****Use our Enduro Series Mounting Instructions.****

Make sure to compress the load. -Roll the top skirt as many times as possible. Fasten the Side Compression Straps and Tighten. Fasten the Top Compression Straps and Tighten. Secure the Excess webbing with the Strap Keeper.

Saddle Bags Full And Compred

Saddle Bags Empty and Compressed

Endruo Dry & Endruo Ultra-Lite Liners:

The Endruo Dry & Endruo Ultra-Lite Saddle Bags come with Tailored Waterproof Liners.

You can either load the bags with the liners in or load the liners then place them in the Saddle bags. This allows you to remove the liners with out taking the Saddle Bags off the bike.

Once the liners are loaded, slid the liners in, close and compress the Saddle Bags to compress and secure the load.

Liner out Rolled closed 3 times

Liner in Saddle Bag

****Be Careful of the Saddle Bag on the EXHAUST Side. Take care not to let any webbing touch the hot pipe.**

We have taken great care to minimize this. We even made the webbing Replaceable.**
