Assembly Diagram

Removal

1. Remove seat.
2. Locate and disconnect license plate light and turn signal wires.
3. While securely supporting the stock fender assembly, remove the two bolts securing the fender assembly to frame. Carefully remove the stock fender assembly making sure not damage the license plate light and turn signal connectors.

Note: The stock bolts will be used again for the Yoshimura Fender eliminator kit

4. Disassemble the stock fender assembly and remove left and right turn signals along with the stock wire grommet.

Note: The stock grommet will be used on Yoshimura Fender eliminator kit

5. Cut the stock license plate light connector from the stock fender assembly. Be sure to cut at least a 6" section of wire from the connector.

Installation

1. Install *070BG-LH-K1*, Yoshimura license plate light onto *12109-FEBKT*, Yoshimura fender bracket using *M4X6BHS*, 4mm button head screws provided in the kit.

2. Install stock grommet onto the *12109-FEBKT*, Yoshimura fender bracket as shown below.

3. Secure *12109-FEBKT*, Yoshimura fender bracket to frame using *8MMLN*, 8mm lock nut with the *8MMWASHER-SS*, 8mm washer and the stock bolts.

4. Using the *BN-SSS-22-18*, solder shrink connectors provided in the kit, connect Yoshimura license plate light wires to the stock license plate light wires as follows:

Red -to- Green
Black -to- Brown

- a) Strip the stock fender light wire ends 1/4" - 1/2" and insert into *BN-SSS-22-18*, Solder Shrink connectors provided in the kit.
- b) Center the spliced wire ends in the middle and using a heatgun or lighter, apply heat evenly on the outer edges of the butt connector to shrink and hold wires in place.
- c) Making sure that the stripped ends are centered, heat the center of the butt connector evenly until the solder begins to liquify.
- d) Allow to cool completely and tug both ends of the wires to verify that connection is secured.

Scan for link to Solder Shrink connector instruction video.

5. Install the stock left and right turn signals onto *12109-TSB-L/R*, turn signal brackets using the stock hardware.

6. Install *12109-TSB-L/R*, turn signal brackets and *070BG-LPF*, license plate frame using *M6X16BHS* and *M6X14BHS*, 6mm button head screws as shown.

7. Route license plate light and turn signal wires through the *12109-FEBKT*, Yoshimura fender kit and under the seat and reconnect.
8. Re-install seat.
9. Check for proper function of license plate light, turn signals, brake light, and that all brackets and components are secure prior to riding.
