16	8MMLN	8mm Nylon Lock Nut	4
**	17029	Yoshimura Sticker Kit	1
**	BN-SSS-22-18	Butt Connectors	2

\*\*\* The Yoshimura Universal Turn Signal Bracket Kit is to be used with aftermarket stud-mounted turn signals and is sold separately.

## Removal

1. Remove passenger seat.
2. Locate and disconnect fender sub-harness connector.

3. While securely supporting the stock fender assembly, remove the four bolts securing the fender assembly to the frame. Carefully remove the stock fender assembly making sure not to damage the connectors in the process.

4. Remove the four fender mounting collars from subframe as they will not be used with the Yoshimura fender eliminator kit.

5. Disassemble the stock fender assembly and remove the left and right turn signals.
6. Cut the stock license plate light connector from the stock fender assembly. Cut wires 2-3" from the license plate light bulb.

## Installation

1. Install (No. 5) 070BG-LH-K1, Yoshimura license plate light onto (No. 3) 12200-FEBKT, Yoshimura fender eliminator bracket using (No. 12) M4X6BHS, 4mm button head screws provided in the kit.

2. Install left and right turn signals onto (No. 6,7) 19675-TSB-L/R, turn signal brackets. Secure using (S) stock bolts, (No. 13) 6MMWASHER, 6mm washer, and (No. 14) 6MMLN, 6mm nylon lock nut as shown.

3. Install (No. 3) 12200-FEBKT, license plate bracket onto (No. 1) 19675-FEBKT, fender eliminator bracket using (No. 11) M6X10BHS, 6mm button head screw.

- Assemble and install (No. 4) 070BG-LPF, license plate frame and (No. 6,7) 19675-TSB-L/R, left and right turn signal brackets to (No. 3) 12200-FEBKT, license plate bracket using (No. 9,10) 6mm button head screws, (No. 13) 6MMWASHER, 6mm washers, and (No. 14) 6MMLN, 6mm nylon lock nuts as shown below.

- Connect the Yoshimura license plate light wires to the stock license plate light wires as follows:

Red -to- Yellow  
Black -to- Black

- Strip the stock fender light wire ends 1/4" - 1/2" and insert into BN-SSS-22-18, butt connectors provided in the kit.
- Center the spliced wire ends in the middle and using a heatgun or lighter, apply heat evenly on the outer edges of the butt connector to shrink and hold wires in place.
- Making sure that the stripped ends are centered, heat the center of the butt connector evenly until the solder begins to liquify.
- Allow to cool completely and tug both ends of the wires to verify that connection is secured.

Scan for link to butt connector instruction video.

- Route fender sub-harness through stock location and install assembled fender eliminator bracket to subframe using (No. 8) M8X30BHS, 8mm button head screws, (No. 2) 19675-FEBKT3, aluminum spacer, (No. 15) 8MMWASHER, 8mm washer, and (No. 16) 8MMLN, 8mm nylon lock nut as shown.

Note: The washers and nuts are installed from above where the stock fender mounting collars were removed. The spacer is installed from below between the subframe and the fender eliminator bracket as shown on the diagram.

- Re-connect fender sub-harness connector and re-install passenger seat.
- Check for proper function of license plate light, turn signals, brake light, and that all brackets and components are secure prior to riding.
